Patient Information

Name: John Doe

Gender: Male

Age: 34

Patient ID: SC-20250729-001

Examination Details

Date of Examination: 2025-07-29

Referring Physician: Dr. Jane Smith, MD

Attending Surgeon: Dr. Alan Turner, MD

Diagnosis

Right Bimalleolar Fracture (AO/OTA 44B2)

Open fracture with moderate soft tissue involvement.

Radiographic Findings

- Displacement of lateral and medial malleoli.
- No additional midfoot or tibial plateau injuries.
- Soft tissue swelling and mild effusion noted.

Treatment Plan

1. Initial wound debridement and irrigation.
2. Open reduction and internal fixation (ORIF) using dual plating.
3. Placement of external fixator for temporary stabilization.
4. Post-operative immobilization with below-knee plaster splint.
5. Analgesia and antibiotic prophylaxis (Cefazolin).
6. Physical therapy to commence at 6 weeks post-op.

Dr. Alan Turner, MD

Consultant Orthopedic Surgeon
